message.h

```
graph BT; message.h --> stringstream; message.h --> string; message.h --> iostream; message.h --> stdexcept;
```

The diagram illustrates the relationship between the `message.h` header and four standard C++ headers. At the bottom center is a black box labeled `message.h`. Four blue arrows originate from this box and point upwards to four separate white boxes with gray borders. The boxes are labeled `stringstream`, `string`, `iostream`, and `stdexcept` from left to right, indicating that `message.h` depends on or includes these headers.
